The Coda D8 is a 2-way coaxial loudspeaker system designed without compromise to provide a true one point source in an ultra compact package. The cabinet contains

a high power 8" woofer and a coaxially mounted driver with 44.4 mm voice coil. The advanced design aligns the acoustical centres of the transducers to produce a single point source. This unique loudspeaker technology provides a coherent wave front without hot spots. Precise directivity of 90° conical ensures uniform coverage with perfect time alignment between the components.

Also available D8 100 V including 100 V trafo, 100 VA.

Supported with a full range of mounting and flying accessories the D8 delivers a state-of-the-art solution for almost any high quality, near field installed sound reinforcement applications such as conference, theatres, clubs, convention centers, airports and 5.1 surround.
