

**Intended use**

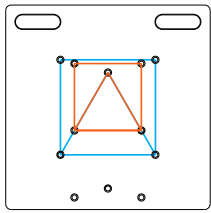

Designed as a foundation for booths and display stands in 30 or 40 truss.

**About**

The Admiral metal base plate gives you more flexibility when rigging a truss. Building tables or truss ports are all possible with this solid base plate. The 6 mm thick metal plate is a sturdy foundation for free-standing objects. The Admiral Baseplate adds 25 kg of weight to the base of each truss construction.

**Options**

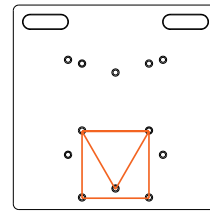

**Symetric**

30 or 40 truss square or tringle in centre possision.

**Asymmetrical**

30 truss square or tringle placement against a wall.

**Features**

16 cm wide handle, for easy handling of the 25 kilo plate.

Countersunk holes for the attachment of conical couplers.

**Compatible with:**

Prolyte, Eurotruss, Fantek, Duratruss, Globaltruss, Internal, Sixty82

**Technical Specifications**

- dimensions: 73 cm x 73 cm
- thickness: 6 mm steel
- weight: 25 kg
- finish: black powdercoated or zinc plated
- centre-to-centre distance: 239mm (30 truss) 339mm (40 truss)
